INVITATION

China Study Tour cum China Concrete Exhibition and 2024

China Concrete & Cement-based Products Industry

Conference (27 May to 2 Jun 2024)

Dear Sir/Madam

On behalf of the American Concrete Institute (Singapore Chapter), it is my pleasure to extend to you and your esteemed organization an invitation to participate in a significant study tour aimed at fostering cooperation between China and ASEAN in the field of low-carbon development and intelligent manufacturing within the concrete and cement-based products industry. This initiative is made possible through the gracious invitation extended by the China Concrete & Cement-Based Products Association (CCPA).

The study tour, scheduled to take place from May 27th to June 2nd, 2024, will be held in conjunction with the CCPA Annual Convention and the 2024 China Concrete Exhibition in Nanjing, Jiangsu Province. This prestigious event stands as the largest annual industry conference and exhibition within the concrete sector, boasting the longest industry chain and serving as the most comprehensive and authoritative platform for the exchange of information and the showcasing of innovative achievements. In addition to the convention and exhibition, our itinerary includes visits to various organizations that play pivotal roles in shaping the industry's landscape. Over the course of three days visits, participants will have the privilege of engaging with concrete suppliers, leading construction materials enterprises, and construction sites, providing invaluable insights into industry best practices and emerging trends. Furthermore, visits to national-level research institutes will offer a glimpse into groundbreaking research and development initiatives driving the industry's evolution. As part of our itinerary, we are delighted to include a visit to the Jiangsu Garden Expo Park, providing participants with a unique opportunity to explore the intersection of urban development, sustainability, and cultural heritage.

This comprehensive program aims not only to deepen participants' understanding of the concrete market but also to foster meaningful connections and collaborations that will propel our shared objectives in sustainable development and intelligent manufacturing. In addition to immersing ourselves in the rich tapestry of knowledge and innovation offered by the convention and exhibition, participants will have the unique opportunity to forge valuable connections, explore potential collaborations, and gain insights that will contribute to the advancement of our shared goals in sustainable development and intelligent manufacturing.

We believe that your participation will greatly enrich the discourse and contribute to the success of this endeavor. Your presence will not only enhance the exchange of ideas and best practices but also serve to strengthen the bonds of cooperation between our respective regions.

To ensure a seamless experience, please find below a breakdown of the costs associated with the tour:
